DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 29-32, drawn to method for identifying cDNA, classified in class 435, subclass 6.
 - II. Claims 94-95, drawn to transgenic animal, classified in class 800, subclass 2.
 - III. Claims 96-99, drawn to nucleic acid encoding VN1, classified in class 530, subclass 350.
 - IV. Claims 96-99, drawn to nucleic acid encoding VN2, classified in class 530, subclass 350.
 - V. Claims 96-99, drawn to nucleic acid encoding VN3, classified in class 536, subclass 23.5.
 - VI. Claims 96-99, drawn to nucleic acid encoding VN4, classified in class 536, subclass 23.5.
 - VII. Claims 96-99, drawn to nucleic acid encoding VN5, classified in class 536, subclass 23.5.
 - VIII. Claims 96-99, drawn to nucleic acid encoding VN6, classified in class 536, subclass 23.5.
 - IX. Claims 96-99, drawn to nucleic acid encoding VN7, classified in class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1646

The products of inventions II-IX, are distinct each from the other, because they are drawn to products having different structures and functions.

The products of invention III-IX, and the processes invention I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of group I can be used in the alternative with any one of groups III-IX.

The products of invention II is not used by or produced by the methods of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney John white on 17 June 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1646

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pak, whose telephone number is (703) 305-7038. The examiner can normally be reached on Monday through Friday from 8:30 AM to 2:00 PM.
